## ABOUT US

When it's about the icons and pioneer engineering work in sanitary ware products our name comes first.

We are having, a 25 years of experience in the manufacturing of sanitary ware and ceramic products. With our innovation and expertise produce a finest sanitary ware products that give excellent solutions to your bathroom.

A seamless bath space solutions for our all consumers seeking for a newly well designed bath space. An excellent and stylish elegant bath design that everyone dream about it.

With cutting edge technology and new generation challenges we take this as new opportunity to gives a unique and complete solution that give 100% satisfaction.

Giving excellent products and services that made customer satisfied is the foundation of our company. The company always believes that satisfying the customer is the part of the it's success journey. Making success journey with customer is one of the milestones that every organization seeks.

More than 2 decades, we as company made innovative products, invested in technology & research, identified needs of our customer. All these give us a huge success that drive our brand name across the globe. With corporate culture and excellent management the company have built a strong foundation that helps to accept any challenge for the next decades.

As having 25 years of manufacturing experience we have supported complex projects to architectural level design project that became icon of modern world. Inspired by the most traditional art work to the craftsmanship of unique scriptural, we have made a classic and stylish products.

As we experience excellent journey of success we also expand our presence across the globe and identify new opportunities to become icon of ceramic and sanitary ware markets. With our quality products and excellent services it leads us in the different countries and gives support to construction and architectural projects.

## PRODUCTION & QUALITY

### Raw material

To make finest sanitary ware products it requires a quality and standard inspection of raw materials. We have made a standard quality bench mark to bench mark to use raw material for making our finest iconic products.

With challenges in modern design we ensure that all raw material must go through complete quality procedure so it gives foundation of an excellent product. This brings out the true essence of sanitary ware products from our

### Quality procedures

In our production line our Crafters follow all the quality procedure to ensure that our product becomes the centre of attraction. With certain quality criteria our products are one of the best & preferred in the market.

A quality process with visual reference that contain the trace of craft and shape to memorise the iconic **our company** products and reinvent the theme of bath space design.

The right kind of quality service that's differentiate us from others Let our quality products exceed your expectations.

## OUR PRESENCE IN WORLD WIDE

### Global approvals & standards

Our company is one of the reputed brands in international markets. By following international standards and norms, our company has vast presence world wide. With quality certificate that accepted at international markets we have made special name that recognised by its products.

With tremendous growth and excellence in ceramic industry it gives us an opportunity to add or give more values to the globe. Creating valuable resource for sanitary ware products that's support everyone needs over the globe.

Make in India Initiative gave us a huge opportunity to showcase our finest products to the rest of the world.

## DESIGN & STYLE

### Innovative and Original Design,

When innovation and creativity inspired by imagination, we craft a unique and special product that suits in your bath space.

We offer rapid 3d technology and latest software we can able to covert your vision into stylish reality with wide range of styles sanitary ware products that crafted with experienced person. Give taste of elegant designs to your bath space.

P R E M I U M  
S A N I T A R Y W A R E

Connecting dots is the way of creating successful and artistic product that convert imagination to reality with latest 3d software we create an object exactly as we wanted.

As we get the raw format of our sanitary ware products with the help of software technology we can easily identify which material need to give exact look as need for bath space design.

It's time our crafters give the final appearance of our sanitary ware products to represent our iconic product to rest of the world.

## EVOLUTION

### Updated ergonomics

When we enter in 21st century a lot happens around the globe. People start changing their lifestyles & their needs. So we also change our mindset and start producing sanitary ware products that meets the need of today's generation.

As the genes changes, we also make changes in our products that suits their moods with accurate research and information we highly developed a product that is as comfortable as they wanted.

### Comfort Height

As a decade passed away changes in the human body were also evolved in the timely manner with the help of research institute, we make sure that all the sanitary ware products are produce with the comfort level of the human body.

## HIDDEN FIXATION

### Hidden fixation system

Fully compatible with our installation systems, our sanitary ware products are secured to a robust steel frame installed behind the wall, leaving a seamless and elegant bathroom scheme with seamless installation using the hidden fixation system, fix any sanitary ware products on a wall in a faster way, in less time and easily

## WATER SAVING

### Can we save water in your bathrooms

Water is a precious element to our life. Our aim is to get maximum cleaning with less water. In our new research & development we successfully use less water that give more cleanness in our sanitary were product.

With this development we can save maximum water for future generations.

7 lt

4 lt

## RIMLESS

### The ultimate rimless technology for you bathroom

A rimless toilet made for significantly easier cleaning and a clear improvement in hygiene. There is no build-up of bacteria and no possibility for limescale to lurk. The Rimless technology ensures quintessential hygiene with effective flushing that offers an efficient solution ensuring that the entire inner surface is rinsed throughout the flushing process.

## TORNADO FLUSH

### What is tornado flush?

Tornado Flush is an integral feature in new toilet. Instead of letting water pour down from the rim as in a traditional flush, the Tornado Flush projects three powerful jets of water from inside the bowl. This motion creates a whirlpool effect that cleans the entire surface.

It has been engineered so that the flushing water comes out at an angle creating a vortex or tornado-like suction. This provides a stronger force when flushing leaving you with a clean toilet every time

### THE POWERFUL TOILET FLUSH

#### TORNADO FLUSH

When the water flows out the holes under the rim of the pan it comes out on an angle, not straight down. This allows the water to create a vortex inside the toilet pan. It does two things; it creates a far more powerful flush because of the force the spiraling water creates & it also washes the inside of the pan much better than any other flushing mechanism.

Need less water,  
Get more clean

Cleanness in every  
edge of the corner

Today's innovation for  
tomorrow's world

## OUR COLLECTION

We create leading-edge products, by combining innovative solutions and excellence in terms of aesthetics and functionality. Our range is developed by soft molded shapes that slenders its impressive volumes. The products have easily adoptable to modern and classic ambience and have lovely ceramic gloss finishes.

-  Use of eco-friendly natural gas residues for better shine and luster
-  Production process according to ISI, ISO European standard
-  High-tempered firing with hygiene-friendly production process

## INSTALLATION

### MAINTENANCE

A few minutes everyday, and a beautiful bathroom forever. Like any other part of your house, the bathroom can be made to look great and made to last if it is taken care of regularly. Here are some simple tips that can help you keep your bathroom space and span.

#### Wash Basin

The wash basin needs to be washed with a mild detergent at least once a day. After washing, the basin must be wiped dry to avoid water stains, especially on dark colours.

#### Closets

Use a plastic bristled brush with a plastic handle to scrub the toilet with a cleanser like Harpic, at least once a day.

After flushing the toilet, give it a "once over" with the brush to avoid minute discoloring.

Keep the toilet brush handy in a convenient stand/ cover nearby.

In the case of Vitreous China Sanitaryware like Silware toilets and basins, if there has been no maintenance over a long period of time, water deposits and discoloration can form on the surface of areas that get wet. In such cases, these stains/ marks can be removed with the help of a solution of dilute hydrochloric acid.

Clean with a soft cloth and warm soapy water.

Use a liquid cleaner at least once a week. Do not use powder paste, thinner or dry cleaning liquids.

To remove fine scratches, use Brasso or car rubbing compound and then polish with a polish cloth.

### CONCEALED WALL HUNG

- If the wall is going to be plastered for a thickness of 12 mm and a tile thickness of 6-7 mm, the projection of the bolts from the finished wall should be 66 mm only.
- If the thickness of plastering and tile is less than the dimensions mentioned above, the bolts that are supplied along with the bracket should be moved into the wall by using a suitable spacer washer between the bolt head and the bracket frame.
- The bracket should be buried into the floor so that the height from the center line of the bolt to the surface of the finished floor is 320 mm.

## INSTALLATION & MAINTENANCE TIPS

- Use C.I. Brackets with rag bolts to install Wash Basin with or without pedestal. If Wash Basin is large in size than it is recommended to install on pedestal screwed to the floor.
- All Wall Mounting E.W.C. to be installed with the help of C.I. Chair bracket as well as with heavy duty rag bolt with cap and rubber bush and outlet coupler.
- All Floor Mounting E.W.C. to be fixed on the floor with help of Screwed and do not use Cement at the hollow portion of E.W.C.
- It is recommended to clean regular with dry cloth / Mild Detergent to avoid stain & if required, diluted Hydrochloric acid may be used.
- Do not use hard bristled / wire brush for cleaning to avoid scratches on wares.

## TECHNICAL SPECIFICATION

PARTICULARS	I.S.I REQUIREMENTS	OUR VALUE
WATER ABSORPTION	< 0.5%	< 0.25%
MODULUS OF RUPTURE	> 600 KG/CM <sup>2</sup>	750 KG/CM <sup>2</sup>
CRAZING RESISTANCE (STEAM PRESSURE OF 37 KG/CM <sup>2</sup> FOR 4 HRS)	NO CRAZING UP TO TWO CYCLES	NO CRAZING UP TO FOUR CYCLES
MINIMUM FIRED THICKNESS	SHOULD BE 6.0 MM AT ANY AREA	> 7 MM AT ANY AREA
WARPAGE	APPLIANCE SHOULD NOT EXCEED SPECIFIED LIMIT	WELL WITHIN IN PERMISSIBLE RANGE
THICKNESS OF GLAZE AT ANY PLACE	NOT SPECIFIED	400 MICRONS (0.4 MM)
SURFACE QUALITY	NO WAVY FINISH ON VISIBLE SURFACE	NO WAVY APPEARANCE
DISCOLOURATION	NONE ON VISIBLE SURFACE	NONE
RESISTANCE TO CHEMICALS	SHOULD BE RESISTANT TO ALL HOUSE HOLD CHEMICALS	PASSES
RESISTANCE TO STAINS AND BURNS	NO STAIN SHOULD REMAIN ON TESTING	PASSES

## TROUBLE SHOOTING GUIDE

ITEM	PROBLEM	PROBABLE REASONS	CORRECTIVE ACTIONS
One piece Closet	1. Water not coming in bowl area while flushing	Water line not cleaned properly	Before installation clean the incoming as well as out going line
		Malfunctioning of Mechanism inside tank	Change the mechanism
		No water in the flush tank	Raise the height change slot to the max. level
	2. Leaking of water in bowl area	Push button is locked	Release the push button
Fitment of mechanism end part and outlet of tank not fitted properly		After opening the mechanism check the fitment	
Malfunctioning of Mechanism inside tank		Change the mechanism	
3. Insufficient Water quantity for effective flushing	Height change slot adjusted at lower level	Closet is not levelled properly	
4. Uneven flow of water from both side of closet	Raise the height change slot to the max. level	Level the closet properly	
Wall hung water closet	1. Water not coming in bowl area while flushing	Flush valve /concealed cistern is not working properly	Change flush valve / concealed cistern
		Flush pipe is not inserted up the end of inlet hole	Insert the flush pipe upto the end of inlet
	2. Leaking of water in bowl area	Closet is not levelled	Level the closet properly
3. Insufficient Water quantity for effective flushing	Connection between closet outlet and drainage pipe is improper	Engage experienced plumber for proper connection	
Wash Basin/ Table Top	1. Overflow choked and foul smell	Full threaded waste coupling might be in use	Replace it by slot cut coupling
	2. Water logging in platform and bowl area	Bracket and basin fixing may be the reason	Levelling to be checked and rectified
	3. No tap hole in the basin	Tap hole is semi punched from back side	Call plumber and open up the semi punched hole
EWC/Pan/ Anglo Indian	1. Water not coming in bowl area while flushing	Flush bend is not inserted up to the end of inlet hole	Insert the flush pipe upto the end of inlet
		Levelling issue	To be levelled properly
